

# The Cherry Lane Way

*The Cherry Lane Way outlines the key Features of our approach to teaching and learning. Based on aspects of The Rosenshine Principles, it has been designed to support the prevalent needs of our pupils, and reflects our determined belief that every child can learn effectively, retain their learning, and be enabled to fulfil their potential.*

## Our Learning is 'For Life' Because...

We build upon what we already know - children recall and record their prior knowledge

*Linked learning helps pupils make connections that render knowledge more meaningful and aid retention.*

We identify and practise key vocabulary - children record and explore this vocabulary in various contexts

*Our emphasis on vocabulary development enables pupils to understand and articulate key learning.*

We learn actively – children undertake practical activities which are recorded through photographs and recounts

*We seek to make learning practical and interactive whenever possible. We reflect on these experiences to enhance our understanding.*

We can explain what we know and understand – children talk about their learning and consider Next Step Questions

*Reflecting on, discussing and articulating our learning is vital to the development of vocabulary and fluency. It also reinforces learning, encourages retention and boosts confidence.*
